Consent to the publication of individual-related data and photographs of students

Dear parents, legal guardians and students,

where fitting we would like to allow a broader public access to information on and documentation of events at our school – sometimes also concerning individual persons. We therefore intend to publish texts and photographs which provide insight into our work as educators or into school events. This includes class photographs, but also individual-related information about school trips, exchanges, competitions, sports events, projects and open days.
In the following we would like to obtain your consent.

(Student's family name, first name, date of birth and school class)

**I / We hereby consent to the publication of individual data, including photographs, of the above named person in the following media:
(Please tick the appropriate box)**

- Yearbook or yearly report
 - Local press
 - World Wide Web (Internet) on the school's homepage www.kfg-mannheim.de
- See notice below.**
- Photographs
 - Individual-related data

The concession of rights excludes payment and includes the right to process and edit, as long as this does not deface. Your consent does not apply to video, film and sound recordings.

You are entitled to revoke your consent at any time – please give this in writing to the Principal. As regards print media, consent may not be revoked after the text or photograph in question has gone into print.

If consent is not revoked it remains valid until the student leaves school.

Consent is voluntary. No disadvantages arise from refusing to or revoking consent.

[Town, Date]

_____ **and** _____
[Signature of parent or legal guardian] [from the age of 14 onwards: student]

Publication on the internet / notice pertaining to data privacy laws:

In the event of publication on the internet, individual-related data (including photos) can be accessed and saved. These data can be located by so-called 'search engines'. It is thereby possible that other persons or firms link the data to other related accessible data and compile a profile, change the data or use them for other purposes.
